

Premium Pet Surfacing for Residential Properties

K9Grass® | by **ForeverLawn®**

"All of my time was spent cleaning, mopping and sweeping. I researched the different brands of artificial turf for dogs, and I was impressed with K9Grass by ForeverLawn. They did an excellent job on my yard. With a clean, green yard I could feel my tension level going down. I should have done this in the first place. I would have saved money! Thanks to ForeverLawn for the great job!"

What Makes K9Grass Ideal for Dogs?

In 2004 ForeverLawn® identified the need for synthetic grass uniquely designed for use with dogs.

To this day, the unique characteristics of K9Grass® stand alone in the industry. K9Grass is engineered to surpass expectations regarding drainage, cleanliness, safety, and durability.

K9Grass mirrors the beauty of natural grass while providing a stain-resistant, durable surface that discourages even the most persistent digger. Our proprietary Flow-Through Backing™ is knitted to provide our exclusive edge-to-edge drainage. K9Grass eliminates muddy spots and trapped odors, providing you with a clean lawn and a clean home.

safe • drainable • cleanable • durable

What Makes us Different Makes us Better!

"The dogs love the K9Grass, and actually play and romp around on it even more than they did on the real grass. And an added bonus—I am conserving water and I no longer have to mow the lawn."

Unparalleled Solutions

Whether you're looking to upgrade your landscaping or install a new pet-friendly lawn, **K9Grass® by ForeverLawn®** is the artificial grass designed specifically for dogs, and is ideal for residential settings. See the checklist below to learn how K9Grass is specifically designed for dogs:

- ✓ Proprietary knitted flow-through backing that provides 100% edge-to-edge drainage at a rate of 2,000–3,000 inches per hour (100 times faster than standard turf), for effective elimination of liquid waste and less odor.
- ✓ Short, dense blade structure for superior durability and cleanability.
- ✓ AlphaSan® antimicrobial protection built into the blades to combat microbes.
- ✓ An infill-free design that enables the surface to be cleaned easily with a vacuum, extractor, power broom, hose, or pressure washer.
- ✓ Eliminates the need for infill such as sand and rubber which are known to slow drainage, harbor waste, and are often the source of unwanted odors.
- ✓ High grade installation components built to last as long as the synthetic grass (i.e. 100% plastic boards, stainless steel staples), keeping the grass secure.
- ✓ An extremely drainable base, utilizing AirGrid 3 or drainable 3/8" stone that keeps urine out of the area.
- ✓ Professional installation by a certified ForeverLawn installation team.
- ✓ Over 16 years of experience and more than eight million square feet of K9Grass synthetic grass successfully installed for dogs.
- ✓ An industry leading 15-year Closed Loop Warranty.

ForeverLawn is an international company, that manufactures products in the USA and services clients locally across the country through its network of dealers.
